## CHAPTER 1: INTRODUCTION

1.1 Background and rationale for the study 1
1.2 Aims and objectives of the study 6
1.3 Methodology 7
1.4 Potential significance of the study 8
1.5 Organisation of the report 9

## CHAPTER 2: THEORETICAL FRAMEWORK FOR THE STUDY

2.1 Historical backdrop to the study of infant feeding 10
2.2 The influence of African culture on infant feeding 11
2.3 Breastfeeding in South Africa in the context of the HIV/AIDS crisis 13
2.4 Transmission of HIV/AIDS through breastfeeding 15
2.5 Advantages of breastfeeding 17
2.6 Disadvantages of breastfeeding 18
2.7 Nutritional support as a form of early intervention for infants with HIV/AIDS 21
2.8 Alternatives to breast milk 23
2.9 Policies regarding feeding 25
2.10 Feeding policy at Coronation hospital  
2.11 Summary of chapter  

CHAPTER 3: METHODOLOGY  
3.1 Primary aim  
3.2 Secondary objectives  
3.3 Research design  
3.4 Participants  
3.4.1 Sampling procedure  
3.4.2 Participant inclusion criteria  
3.4.3 Participant exclusion criteria  
3.4.4 Demographic data  
3.5 Research instrumentation  
3.5.1 Motivation for the use of an interview schedule for data collection  
3.5.2 Construction of the interview schedule  
3.5.3 Content of the interview schedule  
3.5.3.1 Information sheet  
3.5.3.2 Consent forms  
3.5.3.3 Content areas covered in the interview schedule  
3.6 Research protocol  
3.6.1 Application to the University of the Witwatersrand Human Research Ethics Committee (Medical)  
3.6.2 Pre-testing the interview schedule  
3.6.3 Setting  
3.6.4 Data collection  
3.7 Data analysis  
3.8 Validity and reliability issues  
3.9 Ethical considerations  
3.10 Summary of the chapter
CHAPTER 4: RESULTS AND DISCUSSION  54
  4.1 Introduction  54
  4.2 Feeding practices of participants  54
    4.2.1 The feeding practices in relation to previous children  54
    4.2.2 The type of feeds given to the infants in the study since birth  57
  4.3 Attitudes towards breastfeeding  59
    4.3.1 What feed was regarded as best for infants  59
    4.3.2 Persons perceived to influence the decision regarding infant feeding  61
  4.4 Formula and bottle-feeding  65
  4.5 Infants receiving both formula and breast milk  68
  4.6 Awareness of HIV transmission routes  71
  4.7 Antenatal and HIV counselling  73
  4.8 Participants’ feelings regarding their HIV positive status  75
  4.9 Participants’ perceptions of their communities’ attitudes towards bottle-feeding  79
  4.10 Formula and bottle-feeding practices  83
    4.10.1 Bottle-feeding practices  84
    4.10.2 Final consumption point of the formula  86
  4.11 Summary of the chapter  87

CHAPTER 5: CONCLUSIONS AND IMPLICATIONS  89
  5.1 Conclusions arising from the study  89
  5.2 Limitations of the study  89
  5.3 Implications for early intervention and the clinical practice of speech-language pathology  91
  5.4 Implications for infant feeding policies of hospitals  95
  5.5 Implications for future theory and education  96
  5.6 Implications for future research  96
5.7 Concluding comment
